TOIN

Instructions for the Installing Windows Wallet

www.octoin.com

To use the OctoinCoin crypto wallet, you need to go to the website at <https://octoin.com/occ/>, then select and download the appropriate OctoinCoin Wallet for Windows application

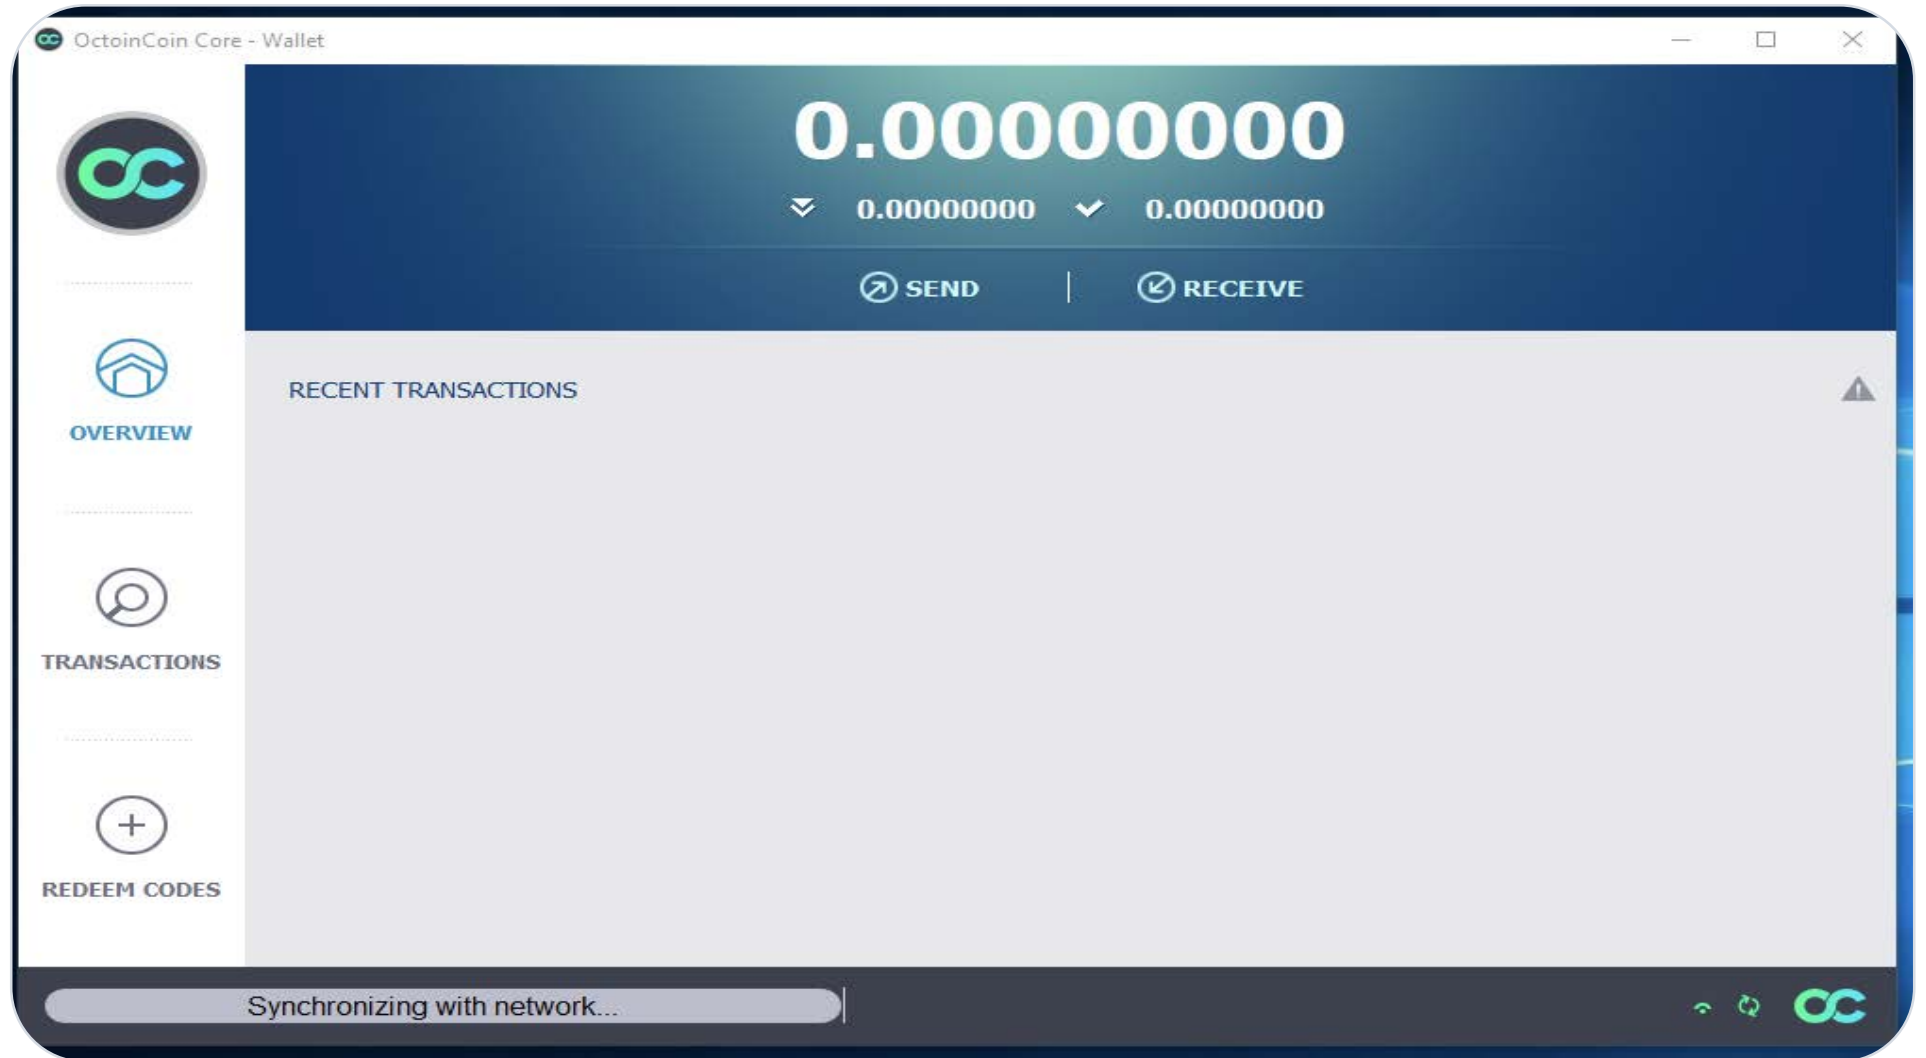

Make the download of the file in a convenient place for you (for clarity we downloaded the folder with the wallet on the Windows desktop).

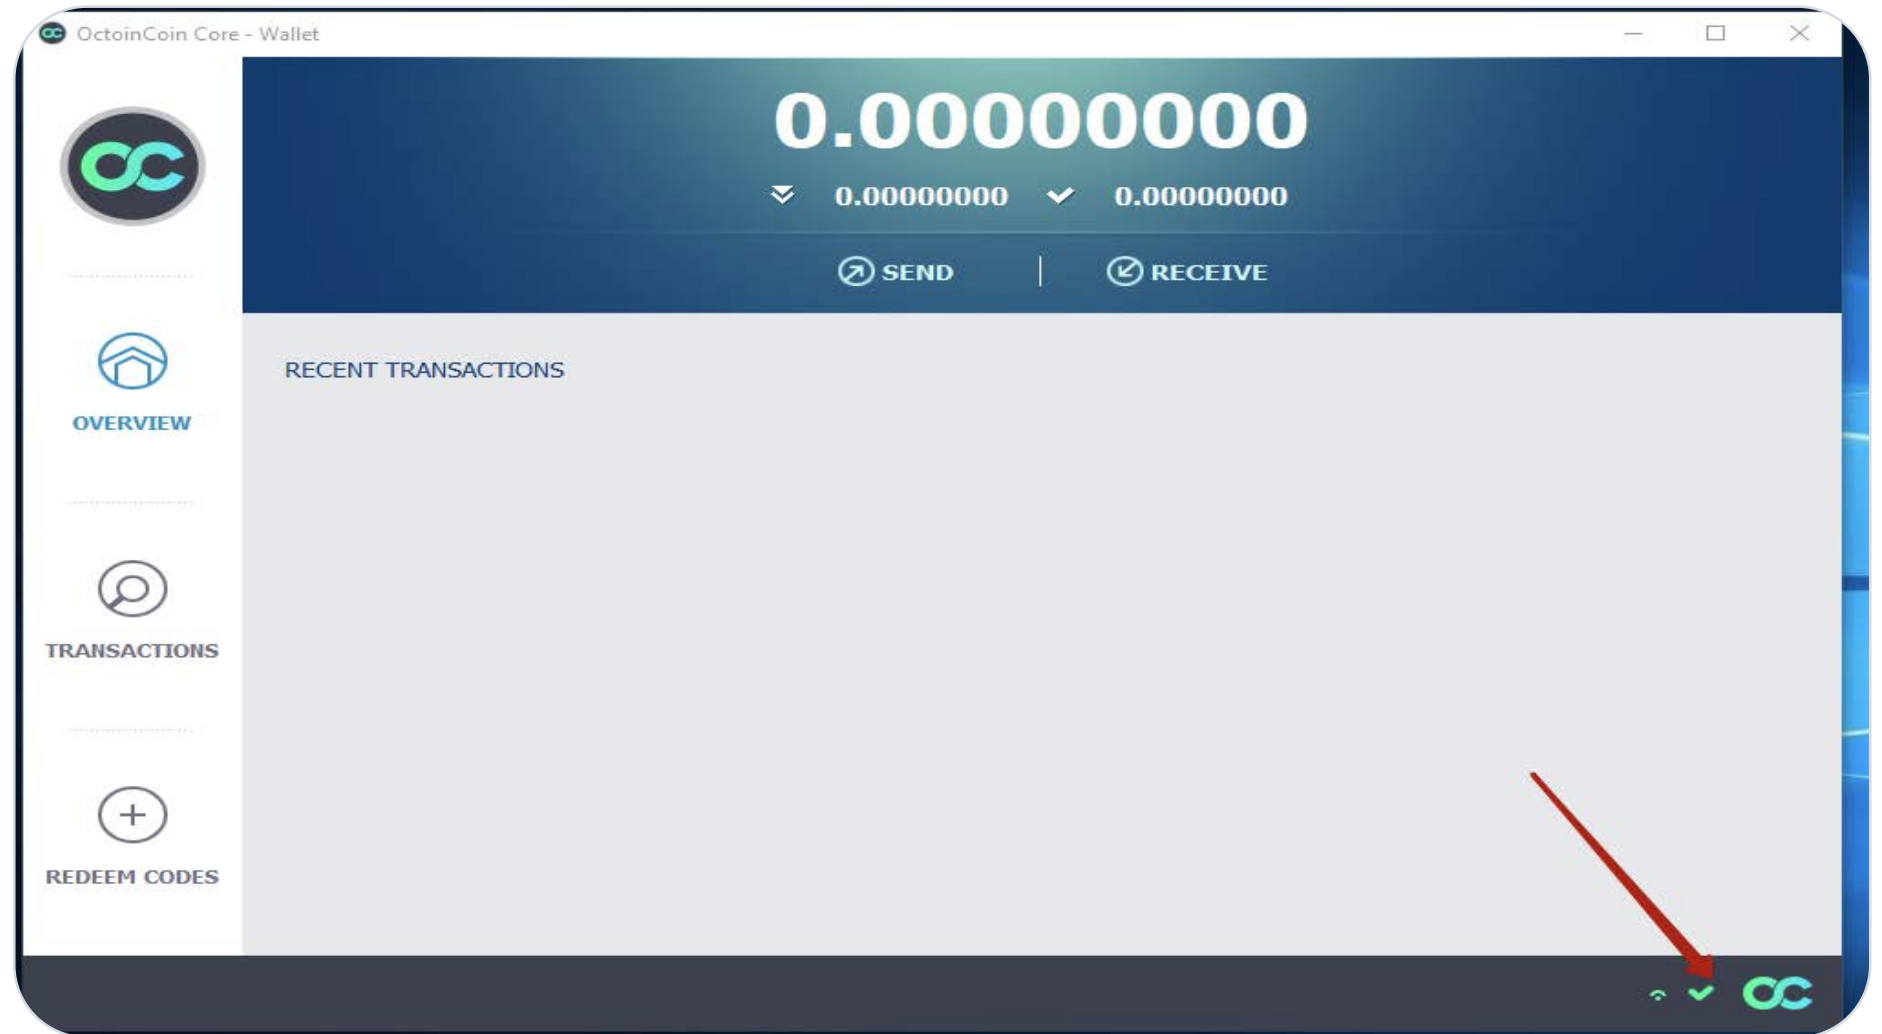

You must find and run the “Octoin-qt” file and you will open the OctoinCoin Wallet application where you can save, drop your OCC coins and also exchange OCC with other users.

Wait until your wallet downloads the entire history of the blockchain system and fully synchronizes with the OctoinCoin network.

This may take some time. The load status bar is located at the bottom of the personal page.
